

496 HEADER UPGRADE KIT

Custom Marine's 496 Header Upgrade Kit

CMI'S 496 package delivers improved performance across the entire operating range of any 496 engine. This upgrade kit has been modified for a more user friendly installation. Brackets have been reconfigured for easier installation and you no longer need to relocate oil lines.

Kits

Kit comes complete with all the necessary installation components.

Switchable exhaust system kits are available as well as custom tailpipes.

Features

CMI's sweeper headers have demonstrated increased output of up to 60 horsepower on stock engines. Mid-range acceleration receives a large boost because of greater available torque, while fuel economy is better throughout all ranges. The polished stainless headers also enhance the look of your engine compartment while providing that deeper sound of power compared to stock manifolds.

CMI...It's all about performance!
